

DARYA TAVAZO BANADER

YOUR RELIABLE HORIZON IN THE MARITIME INDUSTRY

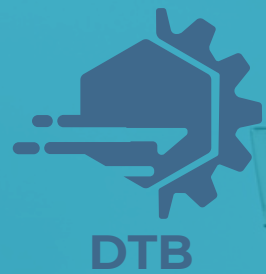

About Us

For more than two decades, Khedri Marine Group has been recognized as one of the leading holding companies in Iran's maritime and port industries. Relying on the extensive experience of its founders and key experts, the Group operates across various industrial sectors, particularly within the maritime field including port construction and operations, management and operation of various types of vessels, shipbuilding and repair, supply of marine equipment and machinery, and management of heavy marine transportation projects.

Owning and managing six Onshore and Offshore vessels, the company proudly provides heavy marine cargo transportation services across domestic, regional, and international routes.

In addition, the establishment and promoting of the Bandarsazan-e Genaveh University of Applied Sciences & Technology "UAST" has made a significant contribution to the training of skilled professionals in maritime and port safety disciplines.

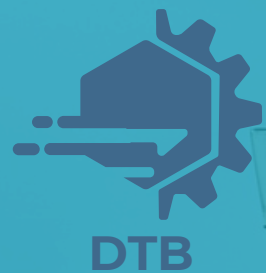

SERVICES AND CAPABILITIES

At Darya Tavazo-e Banader Group, one of the leading companies in the field of maritime and port services, We are fully capable of providing services in a competent and desirable manner. By leveraging the experience of our professional and skilled teams and, most importantly, our specialized technical expertise, we ensure our valued clients receive well-planned and efficiently executed services that meet their specific needs. Our main goal is to provide services that meet international standards, enabling us to be recognized as a trusted, flexible, and efficient business partner within the maritime industry.

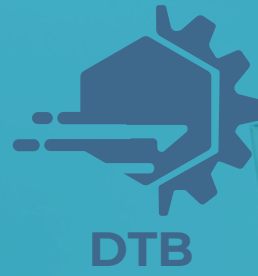

PORT AND LOGISTICS SERVICES

By construction and operation of the first private port in southern Iran, our Group has significantly contributed to the region's economic growth. The port includes a container terminal, indoors warehouses, and container yards, equipped with modern cargo handling equipment and automated port operation systems that ensure efficient and reliable logistics performance.

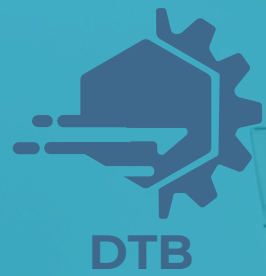

VESSEL MANAGEMENT AND OPERATIONS

The Company has a long and continuous experience in managing of its own marine fleet, by the way possesses in-depth knowledge of shipowners' operational requirements. We provide comprehensive vessel management and operation services in full compliance with international maritime conventions and safety standards (ISM, SOLAS, MARPOL), ensuring efficient, timely, and cost-effective performance for our valued clients.

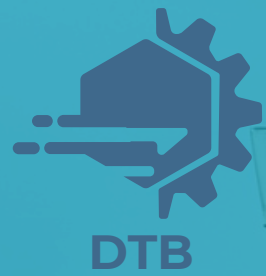

REPAIR SERVICES

By leveraging its technical and financial capacities, the company has undertaken the design and construction of vessels for its own fleet, and these vessels currently constitute a significant portion of the existing fleet. Relying on existing expertise, the company is well positioned to provide its valued clients with high-quality vessel construction services, both within the national territory and abroad.

These services encompass all stages of vessel construction under the supervision of IACS classification societies, including conceptual and detailed vessel design, procurement of required equipment, engineering services, quality control, and full oversight of the vessel construction process.

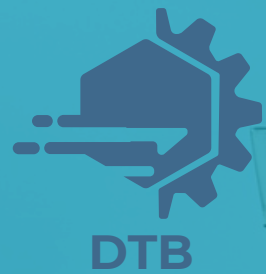

SHIPBUILDING SERVICES

The key personnel of the company possess over two decades of experience in the national maritime industry and have established a strong track record in providing engineering services, repair, and modification of various types of vessels, ranging from small size of vessels to mega sizes “ocean-going” vessels.

Based on our proven capabilities, we assure shipowners and operators that all stages of vessel repair and maintenance can be fully managed by our company. This includes preparation the repair scope, optimizing it in accordance with legal and, operational, and owner budget requirements, and executing all repair activities through our dedicated technical team at our own shipyards or other authorized yards, both domestically and internationally.

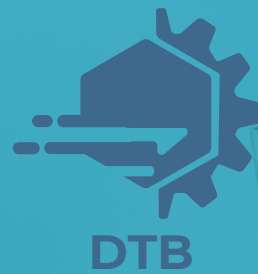

COMMERCIAL AND EQUIPMENT SUPPLY SERVICES

With extensive experience in supplying equipment for its own marine fleet, the company has also been actively involved in procuring equipment for various maritime and port projects across the country. Through strong partnerships with domestic and international suppliers, we ensure reliable sourcing and efficient delivery.

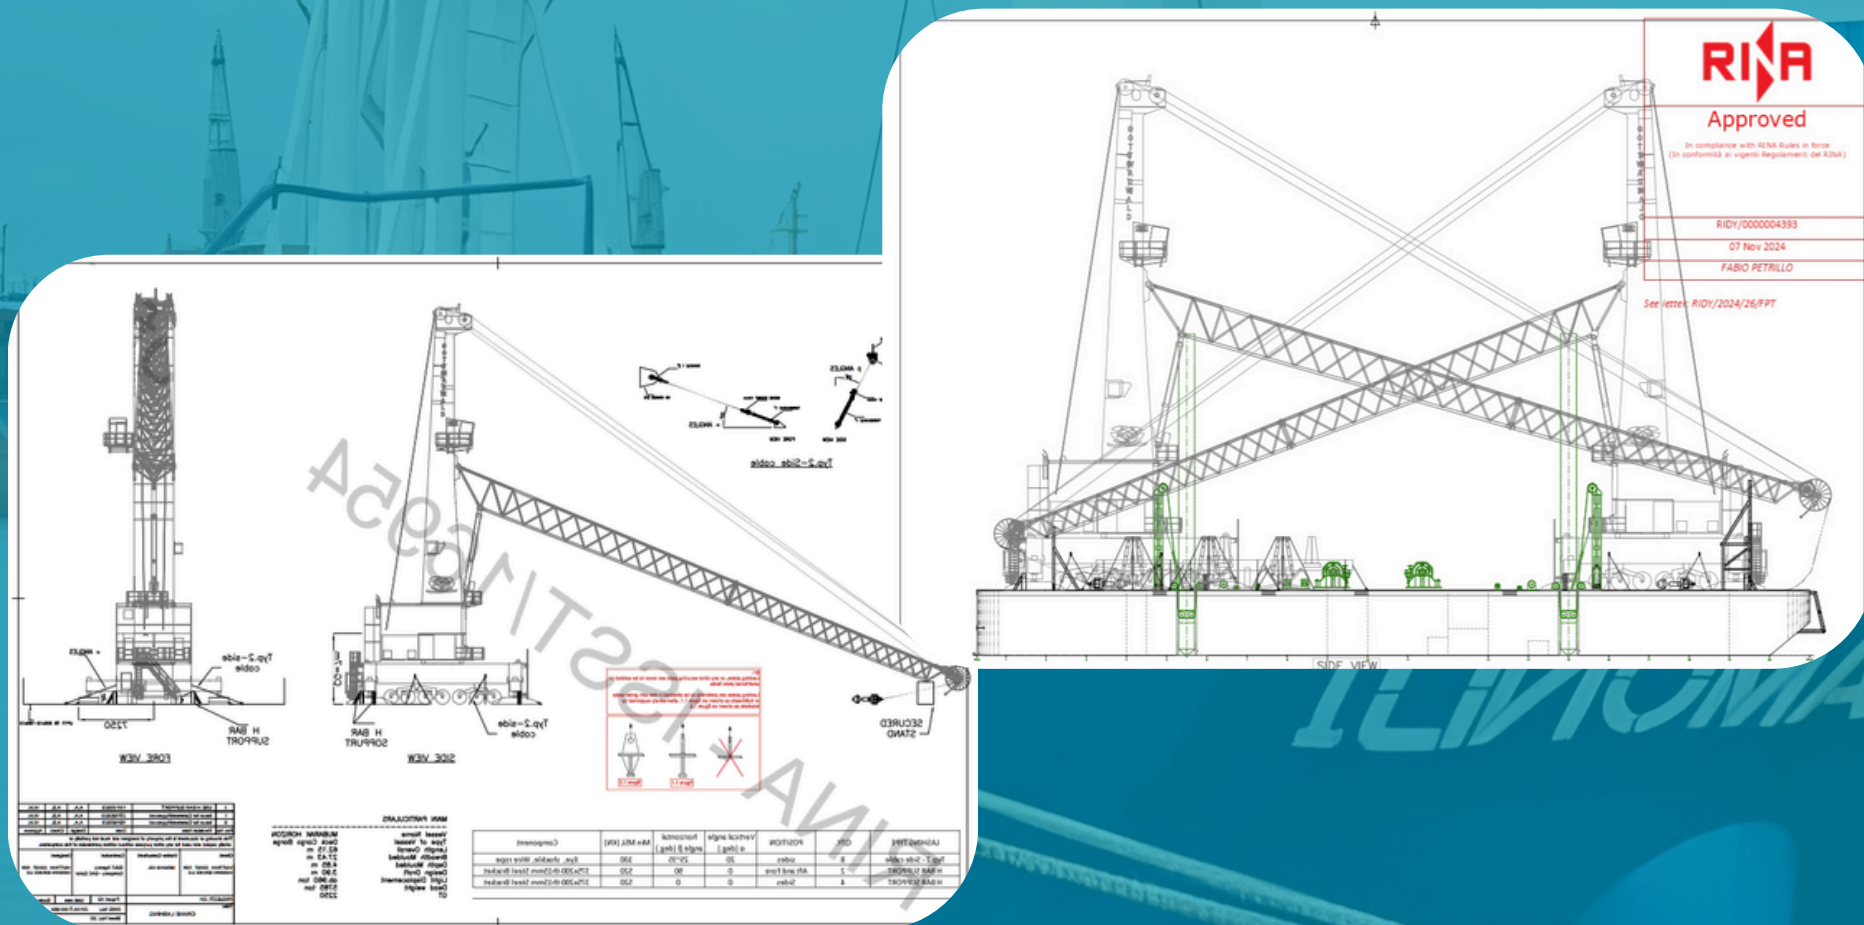

Leveraging our technical expertise and global procurement network, we are capable of providing a wide range of industrial and marine equipment, including steel materials, electrical and navigation systems, deck and engine room machinery, propulsion system components, and spare parts, all delivered promptly and cost-effectively to meet project requirements.

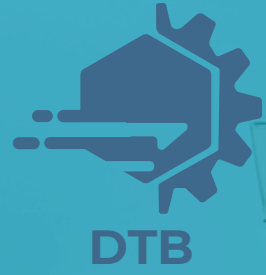

HEAVY MARINE TRANSPORTATION SERVICES

With a team of highly skilled professionals, the company specializes in the planning, engineering, and execution of heavy marine transportation projects. Utilizing suitable vessels tailored to the cargo type and the specific conditions of origin and destination ports, and obtaining classification society approvals at every stage of the project, we ensure the safe, efficient, and reliable transportation of heavy cargo across domestic, regional, and international routes.

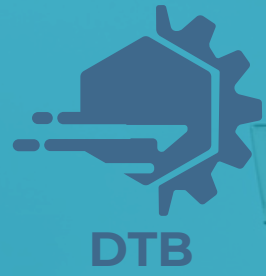

EDUCATIONAL AND CULTURAL SERVICES

Through the Bandar Sazan-e Genaveh University of Applied Sciences & Technology “UAST”, the Group has successfully met its internal training needs while developing a skilled workforce for the maritime and port sectors. By educating numerous specialists at undergraduate and associate levels in port operations, maritime studies, and safety disciplines, the institution has made a significant contribution to human resource development in related fields.
